

Filipe Cardozo

Senior Software Engineer

Email: filipetcardozo@gmail.com

Phone: [+55 \(53\) 99967-0470](tel:+55(53)99967-0470)

Address: Pelotas, Rio Grande do Sul - Brazil

Software engineer with over 5 years of experience delivering scalable digital solutions in critical environments. Proven track record in modernizing legacy systems, providing technical leadership on React/Next.js applications, and delivering high-impact business outcomes. Skilled in complex integrations and direct collaboration with product, design, and executive teams. Full engagement across the software development lifecycle, from conception to operations.

Experience

5 years developing scalable web applications using React and Next.js, including SSR, SSG, code splitting, and performance optimization techniques.

Full-stack background with Node.js, .NET, SQL, NoSQL, and the development of robust RESTful APIs.

CI/CD pipeline automation with Azure DevOps and deployment of applications in cloud environments (AWS, Azure).

Implementation of integrations with CRMs, legacy systems, and BI tools, including ETL processes and adaptation for regulated environments.

Neogrid — Software Engineer (2022 - Present → ~3 anos)

- I'm currently working on the EDI project, one of the company's core platforms, responsible for communication between more than **2,700 manufacturers**, **290 retailers**, and handling over **80 million electronic documents per year**.
- My main focus is **refactoring the legacy platform (JSP)** to a new stack based on **Next.js and React**, emphasizing performance, maintainability, and scalability.
- I lead the implementation of critical features such as BI visualizations, directly impacting stakeholder decision-making.
- I work across the entire development lifecycle: technical decisions, task refinement, alignment with product, design, and architecture.

Marco Investimentos — Full-stack Developer (2020 - 2022 → ~2 anos)

- Led the development of a corporate CRM platform, working as a full-stack developer (React, .NET, Node.js), delivering features such as Kanban boards, dashboards, and financial reports.
- The platform supported the expansion of the advisory team from 20 to over 70 professionals, aligning with the company's operational growth.
- The implemented solutions were critical to supporting the company's net growth from R\$1 billion to over R\$2 billion, ensuring the platform's technical and operational scalability during rapid business expansion.
- Progressed from intern to mid-level developer, taking on front-end leadership and strategic integrations with XP Investimentos.

Education

Software Engineering, Anhanguera Educacional (2023 - 2026)

Electrotechnics, IF Sul Pelotas (2014 - 2018)

Side Projects

SafeTask (2024 - Present)

Solution developed in response to the floods in Rio Grande do Sul, used to coordinate field teams. The platform features an interactive map, real-time task execution, and analytical dashboards.

Stack: React, Next.js, Node.js, MongoDB, GCP, TypeScript, Firebase

Meu Repertório (2022 - 2023)

Platform for musicians to organize sheet music and setlists. Includes editing, viewing, and integrated management features.

Stack: React, Next.js, MongoDB, Firebase, TypeScript

Imob Partners (2023)

Property management app using GCP + ChatGPT for automatic description generation.

Stack: React, Node.js, MongoDB, GCP, TypeScript

Construtora Fazz (2021 - 2024)

System for managing orders, materials, construction finances, and daily construction reports (RDOs).

Stack: React, Next.js, MongoDB, TypeScript

Skills

Hard Skills

- **Front-end:** React.js, Next.js, TypeScript, Webpack, SSR, SSG, Jest
- **Back-end:** Node.js, .NET Core, REST APIs, SQL, MongoDB
- **DevOps & Cloud:** Azure DevOps, CI/CD, GCP, AWS
- **Architecture & Processes:** Design Patterns, Scrum, Kanban, Complex integrations

Soft Skills

- Problem-solving
- Decision-making
- Clear communication with both technical and non-technical stakeholders
- Change management and continuous improvement
- Technical leadership and cross-team collaboration
- Strategic thinking and business value focus

Languages

- **Portuguese:** Native
- **English:** Professional proficiency (technical reading, documentation, team communication)
